PRESS RELEASE

Detroit Testing Laboratory, Inc. Expands Hybrid/Electric Vehicle Battery Testing Laboratory Again

November 17, 2009

Detroit Testing Laboratory, Inc., a leading automotive and industrial testing and development laboratory, announces it has expanded its Hybrid and Electric Vehicle Battery Testing Laboratory with the purchase of additional HEV/EV Battery Cyclers. The new cyclers will be located within DTL's 80,000 square foot World Headquarters located at 27395 George Merrelli Dr in Warren, MI.

DTL has selected Bitrode Corporation, the leading manufacturer of battery testing equipment, as the test equipment supplier for the laboratory expansion. This expansion increases DTL's laboratory capacity to over 140 channels of cell, module and pack cycling utilizing Bitrode's MCV, FTV, and FTF test systems. DTL's Hybrid and Electric Vehicle Battery Testing Laboratory also includes shock, vibration and abuse testing of battery cells and packs.

"Detroit Testing Laboratory continues to be the leader in independent testing of lithium ion batteries for automotive, military and aerospace applications. Many of the leading manufacturers have selected DTL as their testing lab of choice due to the diverse services we offer and the depth of our engineering team", stated Chief Executive Officer Alfredo Apolloni. "Despite these tough economic times we continue to see high demand for our services and our continued growth will be dependant upon investments such as this."

About Detroit Testing Laboratory, Inc.

Detroit Testing Laboratory, Inc. is an independent A2LA accredited testing and development laboratory, providing calibration, electrical, battery, mechanical, fuel systems, environmental, dynamics, and materials testing services to automotive and industrial clients since 1903. More information can be found at www.dtl-inc.com.
