

PRESS RELEASE

Detroit Testing Laboratory, Inc. to Relocate Primary Test Facility

July 26, 2006

Detroit Testing Laboratory, Inc. to Relocate Primary Test Facility Detroit Testing Laboratory, Inc., a leading automotive and industrial testing and development laboratory, announces that construction on their new World Headquarters, which began in May of this year, is progressing as scheduled and will be prepared for occupancy in September of 2006.

The 80,000 square foot state-of-the-art engineering and testing laboratory facility is located at 27485 George Merrelli Dr. in Warren, just a few hundred yards north of the current Detroit Testing Laboratory, Inc. headquarters. The new facility will consolidate all activities currently ongoing in Warren including **Environmental, Vibration, Mechanical, Hydraulics, Electrical, Materials, Metallurgy, Calibration** and **Product Certification** laboratories and will allow significant expansion of all technical areas. Detroit Testing Laboratory, Inc.'s new headquarters will also create a much more customer-friendly environment with its numerous customer offices, conference areas and wireless internet access throughout the facility.

Detroit Testing Laboratory, Inc. expects to expand the facility to 100,000 within a few years based upon current growth projections.

Chief Executive Officer Alfredo Apolloni commented, "Everyone at DTL is excited about this move. Our phenomenal growth has turned this move to a larger facility into an absolute necessity. We have simply outgrown our current facilities and it cannot get done fast enough."

Extensive planning and creative business strategies implemented over the past year will enable Detroit Testing Laboratory to facilitate the relocation with little or no effect on current operating capabilities. Company administration anticipates that the relocation will be completed in its entirety by the end of the year.

About Detroit Testing Laboratory, Inc.

Detroit Testing Laboratory, Inc. is an independent A2LA accredited testing and development laboratory, providing calibration, electrical, mechanical, fuel systems, environmental, dynamics, and materials testing services to automotive and industrial clients since 1903.
